How to Describe Data

How Science Turns Data Into Knowledge

Decoding AI: A Deep Dive into AI Models and Predictions

Jul 2, 2024

Jirayu Kaewprateep

has successfully completed the online, non-credit Specialization

Understanding Data: Navigating Statistics, Science, and AI

In this Specialization, learners developed essential data literacy skills to navigate claims about statistics, science, and artificial intelligence for informed decision-making. The Specialization also focused on applying data literacy to real-world problems through hands-on projects and case studies. Learners engaged with demonstrations and completed a series of graded quizzes to confirm their understanding of core concepts.
